## Public Education

**Public education is an important component of integrated pest management . It's important for people to understand their role in the prevention of mosquito habitats. Both children and adults should understand mosquito biology and control.**

### Public Events

The Commission participates in a number of events held around the county. Some examples are: the 4-H Fair, Earth Day, and National Night Out. Various literature is available along with displays of live larvae and mosquitofish. Interactive displays are also available to the public. .

### Outreach Programs

Commission staff is available to give presentations to civic groups, public officials, and private industries. A special school program is also being developed for 4th grade students. All the presentations can be customized based on the audience. Presentations are supplemented by interactive displays and literature.

### Literature

Literature on various topics is available for the public. Information on mosquito biology, mosquito control, ticks, pesticides, and the Commission program are available. Many of the hand-outs are developed by the Commission, while others were published by Rutgers University.

### On the Web

The Morris County Mosquito Commission is on the web at [www.morrismosquito.org](http://www.morrismosquito.org). Check often for up to the date information on spraying schedules and to see where the water management crew is working.
