**Asian Tiger Mosquito**  
*Aedes albopictus*

## ASIAN TIGER MOSQUITO DISPLAY

A travelling display featuring information about the biology of the *day biting* **Asian Tiger Mosquito** and techniques to reduce this troublesome pest from making its home in your neighborhoods. New this year is information about our mosquito control services and how we help the community.

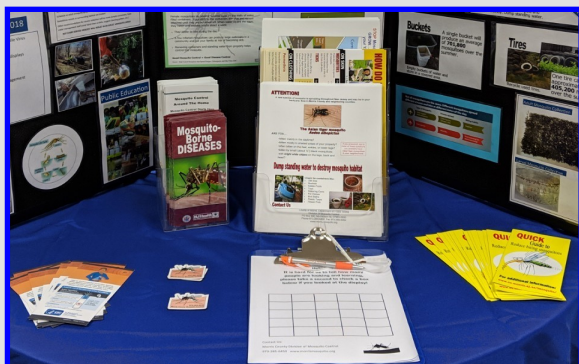

### **Quick Facts:**

#### **Asian Tiger Mosquito**

- Lays their eggs in containers with standing water
- Aggressive, day biting mosquito
- Populate an area quickly causing nuisance complaints to increase
- Can transmit disease in some situations

**Popular locations are  
libraries, senior centers &  
municipal building lobbies**

**Thanks for partnering with us!  
Last year the display traveled to  
23 locations!**

### **Interested in hosting the display?**

- Our staff sets up and breaks down in a publicly accessible area that you have designated.
- A table, trifold display, literature featuring the Asian Tiger Mosquito and source reduction is provided.
- To get the maximum exposure throughout Morris County, each municipality hosts the display for one week beginning April 9.
- Help us promote through social media.
- **Host either the Tick Safety Display, the Asian Tiger Mosquito Display or Both!**
